

In September next year, the [Guidelines International Network conference](#) is coming to the UK for the first time. We are really looking forward to welcoming guideline developers from around the world to the historic venue (Principal Hotel) in the heart of Manchester.

The theme of the event is: [Why we do what we do: the purpose and impact of guidelines](#). The Scientific Committee have been working hard to pull together an exciting and dynamic programme that will address the big topics and challenges of the moment. The plenary programme will showcase the most inspiring and thought-provoking speakers on topics such as innovation in implementation, patient inclusion in guideline development and the cost implications of the guidelines we produce.

"We are certain the theme of the event will ensure we receive a record number of abstract submissions that showcase the excellent achievements that we know are being made across all the regions. The Committee are really looking forward to reading your abstract submissions and using them to create the best G-I-N programme to date." – John Kinsella, 2018 Scientific Committee Chair
