Tuesday 26 October 2021, 12.15 – 13.00 (BST)

The Long and Winding Road: A DynaMed Case Study

To work through this complex clinical scenario extending over a two-year course of illness Dr. Alex Rae-Grant, Senior Deputy Editor of Neurology, Psychiatry and Palliative Care for DynaMed will utilize DynaMed, a point of care evidence-based tool that integrates international guideline information into a comprehensive database. Dr. Rae-Grant will demonstrate how DynaMed may optimize care by providing current guideline information organized in an evidence-based framework. In addition, shared decision-making tools related to the clinical condition will be reviewed and attendees will get a deeper look at specific issues related to the transgender patient as well as implicit biases in care related to race and ethnicity.
