Welcome Message

On behalf of GIN, our organising committees and local host McMaster University, we are delighted that you are joining us at our 17th Guidelines International Network (GIN) conference in Toronto.

This year's conference theme is Making health choices transparent, equitable and efficient: strengthening global guideline quality, technology, collaboration, and adaptation.

The theme will explore:

- Equity and Guidelines
- Efficiency in Guideline Development
- Visualization of information and recommendations
- "Guidelines Without Borders": developing recommendations to guide care globally
- Choice or decision: Transparency

About GIN

Founded in 2002, the Guidelines International Network (GIN) is a global network whose mission is to lead, strengthen and support collaboration and work within the guideline development, adaptation and implementation community.

As a major player on the global healthcare quality stage, GIN facilitates networking, promotes excellence and helps our members create high quality clinical practice guidelines that foster safe and effective patient care.

GIN is the connector in the guideline world. We currently have 111 organisational members and 236 individual members from 62 countries - all with a common goal of improving healthcare through using evidence and implementing evidence-based guidelines.

GIN's aims are simple - to enable and facilitate networking and collaboration, whether national or international, bring the best minds together and support continuous learning and improvement and at the same time, reduce duplication of effort across the guideline world.

Leadership:

- Zac Munn GIN Chair
- Duncan Service GIN Conference Committee Chair
- Holger Schünemann GIN Scientific Committee Chair
- Miloslav Klugar Scientific Committee Vice Chair
